

FIDES LED LIGHTTTING MODULE

FIDES advantages

Durability, Economy, Fire resistance, Sound isolation, Easy installation, Ionized air purifier.

Galvanized sheet LED Board

Tin plat galvanized metal sheet LED board are good thermal capacity with fire resistance using water proof coating material.

Variable power LED's

Ample thermal capacity metal sheet LED board are give to advantage of power up at same LED.

FIDES-P4 solid state valley fill AC- DC converter

Our devastating technology AC-DC converting circuit provide solid state valley fill with 50mW standby power control system are make 20 years more reliable LED driving sustainable green building lighting.

Sustainable gypsum lighting

Gypsum board is excellent fire-resistive building material. Reaction to fire for building products historically is given by classification within national standards such as DIN4102.

FIDES galvanized metal sheet LED board with FIDES-P4 novel AC-DC converting theory based flicker free circuit makes realized sustainable feature building lighting controlled green building.

FIDES ceilings lighting advantages

Durability, Economy, Fire resistance, Sound isolation, Ionized air purifier protected aerial infection, specially school, library, office, hospital public area.

Just Plug In support to quickly old building modernize.
